ap23.1w HENRY MAHON, Recr.

SOME OF THE OPPOSITION.

Almost all of the papers of the Pacific Coast have favorably mentioned Senator Jones' speech on the silver question. A large majority believe that it has furnished food for thought which will ultimately lead to grand results. But the Sacramento *Record-Union* is hard to please. It ridicules the financial theories promulgated by Mr. Jones, and in many different ways attempts to slur the able effort of the Senator. It is a very easy matter to explain the cause of such opposition to the Senator personally, and to his late speech in particular, as has been manifested by the Central Pacific organ. The Senator is not one of their phantoms; he has not proven himself an advocate of their infamous measures. On the contrary he has been somewhat of a thorn in the side where the heart lies, of that great corporation. He is one of those men who do not believe the creature of the law is above the law itself; he repudiates the proposition that all men and things must pay tribute to the C. P. R. R. He is in favor of a competing line across the continent, which he hopes will relieve the people from some of the discriminations and oppressions now practiced by the present monopoly. Taking these facts into consideration it is simple to understand the animus entertained by the recognized organ of the company against a man who has the bravery to husband such thoughts and give utterance to them when occasion requires.

At a Republican caucus in Cambridge, Mass., April 22, to elect delegates to the Massachusetts State Convention, James Russell Lowell made a humorous and very effective speech, and declared himself in favor of Bristow for President. Ex-Governor Washburn, who was present, also declared himself in favor of the same candidate.

It is now estimated that nine-tenths of all the exhibits for the Centennial exhibition are now in place in the different departments and that the schedule will be completed in the next few days. The Corlies engine in the machinery hall has been in successful operation for the past two days.

The President has transmitted to the House the report of the President of the Centennial Committee upon the ceremonies to be observed at the opening of the exhibition on the 10th, and calls attention to the invitation extended to Senators and Representatives.

In closing an article on the new Bristow Club of Boston the *Transcript* of that city says: "With him our contest next Autumn means victory; with any other it may mean defeat."

SENATOR MORTON will, this week, fully answer the Democratic slanders about him, recently set afloat. He will disclose the unwritten history of Indiana during the early part of the Rebellion.

Born of the United States Senators from New Hampshire favor the nomination of Bristow at Cincinnati.

TAPSCOTT, the city made famous as the birthplace of the apostle Paul, suffered a very severe loss by fire, January 10th, the chief business being destroyed, and other losses incurred to the amount of \$750,000. The fire is supposed to have resulted by the gnawing of matches by rats. The place has 20,000 inhabitants, but is without any supply of water during the winter season, and the whole city was saved from destruction only by a fortunate change of the wind.

The man who does not know his own mind will obtain an introduction as soon as his mind is big enough.

TELEGRAPHIC NEWS.

EASTERN DISPATCHES.

Another Sioux War—Sykes as Minister to England—An Electoral Territorial Bill.

WASHINGTON, May 3. General Custer will leave here at once to take command of his column, which is to take the field against the hostile Sioux. He says three columns are about to start under a plan of operations directed by Sheridan. They aggregate in numbers about 3,000 men, while it is said the Sioux can put 8,000 warriors against them. Some very hard fighting is expected, if not the hardest yet known.

The House Committee on Territories agreed to-day to report favorably on delegate Patterson's bill to enable residents in the Territories of the United States to elect their own officers. This will relieve the President of the power to appoint Territorial Governors and other officials, and place it in the hands of the people of the Territories, who do not seem in all cases to be anxious to exercise it.

The journals generally denounce the appointment of Wirt Sykes as Minister to England, and compare him unfavorably with the rejected Dana.

Black Hills.

CHICAGO, May 3. A party of Black Hillers, who have just returned to Sioux City, says that there is no grass for cattle or horses in that country, and that the stock is dying off rapidly from starvation. The grain is not yet started, and in many places snow still covers the ground to the depth of a foot. In the vicinity of Custer City this party counted the carcasses of four hundred animals that had recently died of disease and starvation.

Centennial Railroad Fares.

PHILADELPHIA, May 3. At a meeting of the United States Centennial Commissioners last evening, the committee which had been appointed to confer with the Directors of the railroad companies of the United States, reported that they had conferred with some of the leading roads and there was every prospect of a reduction in rates of fare for those who desired to attend. It is probable that a general convention of ticket-agents will be called to fix the rates.

New Gold Fields Reported.

NEW YORK, May 3. A special to the *Herald* from Bozeman, Montana, says that new gold fields have been discovered at the head of Tongue river, and that a party of one hundred and sixty miners have left for the diggings.

WESTERN DISPATCHES.

Destructive Fire in Pioche.

PIOCHE, May 3. About 3 o'clock this morning a fire broke out in an unoccupied building on the east side of Lacour street, and owing to the inflammable character of the buildings in the vicinity spread in either direction till the whole block from Staples store to the Beupre brick block was in flames. The fire communicated to the west side of Main street, destroying all the buildings between Beupre Block and Hughes' blacksmith shop. In all about twenty-five buildings were destroyed. With the exception of the *Daily Journal* office and Mrs. Hickox's millinery establishment, the houses burned were residences. Had the fire jumped to the west side of Lacour or the east side of Main street, the business of the town would have been destroyed; and in fact the destruction of the whole place was seriously threatened, but there being little or no wind at the time, by the united efforts of the fire department and the citizens the fire was confined to the limits named, although in many instances the great heat fired buildings on the west side of Lacour and the east side of Main street. They present a very delapidated appearance this morning. Lacour street from Judge Rives' residence to Lynch's block especially, the window panes being all broken and the house fronts completely charred. The fire is supposed to be the work of an incendiary. The loss is not known yet.

Anti-Chinese Meeting—Disastified.

SAN FRANCISCO, May 3. The Young Men's Reform Club met last night. Communications were received from several points in the interior and read, asking co-operation.

tion. Sam Brannan advocated the burning of Chinatown the same as had been done in Antioch. He said that violence was justifiable. The report of the Antioch proceedings was read, and on vote being taken, as to whether that action was well taken the vote was unanimous in the affirmative. The Secretary announced that he had received a letter from Santa Rosa stating that a club had been organized there called the "Order of Gershon" and proposed to admit all anti-Chinese clubs. Every man who joins the order is obliged to take an iron-clad oath not to employ Chinese in any capacity. The Sergeant-at-Arms of the Reform Club read a telegram from New York saying that 2,600 stand of arms can be delivered here, at ten days' notice, at \$5 50 per musket. Many Democrats are dissatisfied with the County Central Committee's appointing delegates to the State Convention and are moving to have the Committee rescind their action and have primaries. Last night a number of the dissatisfied met in the Eighth Ward and organized an opposition club.

Rich Gold Discovery in Australia.

The most important discovery ever made in connection with gold mining in Australia, with the exception of the original discovery of gold in 1851, occurred on the 11th of September. It is the finding in the shaft of the Magdala Company, at Pleasant Creek—or as it is now called, Stawell—of a gold-bearing quartz reef at the unprecedented depth of 1,681 feet, or about 700 feet further into the interior of the earth than gold has yet been obtained in Victoria. The managers of the company since they struck the reef, have gone on sinking so as to ascertain the thickness of it in their claim, and they have passed ten feet of it without as yet having gone through it. Some specimens of the stone have been sent to the School of Mines at Ballarat. Their specimens, weighing altogether 10½ pounds, were treated by two different processes, the result being at the rate of 19 dwt 15 gr. per ton of stone by one process, and 14 dwt. 15 gr. by the other. Four other results which were obtained showed a much richer quality of stone, but as the stone tested in those cases was taken from a much higher portion of the lode, and above the mullock base, it is thought probable that the upper and lower portions of the lode may be much richer than the center. The directors have decided to break off a good sized block of the stone and send it to the Philadelphia exhibition, with a sectional drawing of the shaft and the different strata passed through.

A Graceful Recognition.

The *Enterprise* of yesterday makes mention of an act of honor and courtesy performed by Senator Jones:

Yesterday we were shown a private telegram from Senator Jones, evidently speaking for himself and Senator Shaon, addressed to Conrad Wiegand. We can scarcely say who the message the more highly honors, the senders or the recipient. It is a merited recognition from one of the most remarkable men in the nation of simple, earnest effort for the common good by a private citizen, of which he may well be proud. The occasion of its being sent was the receipt in Washington of a clipping from the *Enterprise* of last Sunday a week ago, setting forth Mr. Wiegand's views on the silver question, since issued in pamphlet form. Without pretending to verbal precision, as neatly as we can recall the long dispatch, it read: "Thanks for assistance in reawakening correct views on the silver question. We deem it best to strive for the restoration of the silver dollar unconnected with any other proposition. That accomplished, there will be no difficulty in securing legislation to provide governmental custody of silver and issuing of receipts therefor in money-note form. Public opinion is rapidly rising in our favor, but success is by no means certain at this session." "Jno. P. Jones."

A WALKING MACHINE.—A road engine is being tested in France having no wheels, but provided instead with what may be called legs—straight rods terminating in broad circular plates—three legs in front and three behind. The invention, it is claimed, is particularly adapted for carrying great weights up an incline. The one at present at work upon a French railway, weighs ten tons, and goes four to five miles an hour, but can accomplish eleven or twelve miles.

"I don't like Winter," said one pickpocket to another, "everybody has his hands in his pockets."

A man may be said to be drinking like a fish when he finds that he has enough to make his head swim.

Intemperate winds are apt to get high.
